"Experience is the only thing we can truly own in our lives..."

Summary

A software developer with a background in automation testing.

I genuinely believe that our World can become much better if every living being had the most positive life experience. I see tremendous opportunities to contribute to the improvement of people's life experiences by developing software solutions. Therefore I would love to join a team of like-minded people, where I can effectively grow and apply my professional and personal skills to benefit the community.

Skills

Front-end	HTML, CSS, JavaScript, React, Next.js, Gatsby.js
Back-end	Node.js, Express, REST API, Ruby, Rails
Databases	MongoDB, SQL, PostgreSQL
DevOps	Heroku, AWS, Docker, Jenkins
Languages	English, Ukrainian, Russian

Work Experience

Web Design Café
Adelaide, Australia

PM/QA
Sep. 2021 - present

- Developing web pages for the clients
- Customising CSS of WordPress themes
- Setting up WordPress plugins
- Communication with the clients
- Organisation and coordination of the team

General Assembly
Australia

FULL STACK SOFTWARE DEVELOPER
Nov. 2020 - Aug. 2021

During the course I have built a number of projects using different technologies stacks. The most mature of them is Resume Builder App - The open-source web application for fast and easy creation and publishing (with unique public URL) of resumes 'tailored' for each particular vacancy.

- lets.Get(IT) - built using React, Next.js, MongoDB. Building this application, I've learned that integration of different technologies into one app might be challenging, but also it gives a significant improvement of developer's skills and knowledge base
- Memo - a simple notes-gathering app, built with React and Ruby on Rails, using PostgreSQL database. Learning how to build a backend using Ruby on Rails has broadened my perspective as a developer
- CountLess - a budget app that helps track incomes and spending. Main focus for this project was building backend. I learned how to protect routes, how to use Passport.js package and a basics of SSR using Handlebars

Relocation
Australia

Feb. 2019 - Nov. 2020

During this period (after moving to Australia), I put all my efforts into settling on the new place, learned a new culture, and embraced a commitment towards change and personal development. I continued my self-education in Software Development until I decided to take a leap and enrolled in a Full Stack Software Engineering Immersive course of General Assembly

GlobalLogic   *Lviv, Ukraine*
                                                                      Nov. 2017 - Feb. 2019 and Sep. 2015 -
SOFTWARE AUTOMATION TEST ENGINEER   *Jun. 2017*

- Testing software for a medical device (insulin pump), utilizing a custom set of frameworks and libraries, using JavaScript language.
- Writing test scripts and test scenarios to meet acceptance criteria and quality standards
- Performing formal testing to provide the results for the Federal Drug Administration (FDA)
- Automated test code-review and test stabilization
- Reviewing design inputs according to the scope of testing issues
- Creation and updating of UI and Functional Test Cases (manual and automation)
- System components and functions analysis
- Performing iteration analysis and test planning
- Participation in knowledge-sharing activities

Rolique   *Lviv, Ukraine*
